Jaipur, Rajasthan, India (Remote Available)

PROFESSIONAL SUMMARY

Results-driven DevOps Engineer with 3.5+ years of hands-on production experience architecting, automating, and maintaining high-availability multi-cloud infrastructure across Hetzner Cloud, DigitalOcean, AWS, and Oracle Cloud Infrastructure (OCI). Proven track record scaling and managing multi-cloud Linux infrastructure across 60+ active production nodes, achieving zero active firing alerts fleet-wide using Prometheus and Grafana, and containerizing legacy monoliths into Docker Compose microservice fleets with zero downtime. Red Hat Certified Engineer (RHCE & RHCSA) skilled in building automated Python/Ansible provisioning engines, high-speed in-memory database streaming pipelines, and enterprise security baselines.

CORE SKILLS

Cloud Platforms: Hetzner Cloud (ARM64 & AMD), DigitalOcean (Droplets, VPC, Volumes), AWS (EC2, VPC, IAM, S3), Oracle Cloud (OCI)

Observability & SRE: Prometheus, Grafana (9 Dashboards), Alertmanager, Loki, Promtail, Node/MySQL/Blackbox Exporters

DevOps & Automation: Ansible Playbooks, Docker, Docker Compose, Bash Scripting, Python CLI Automation, Git, GitHub

Linux Administration: RHEL, AlmaLinux, CentOS, Ubuntu 22.04/24.04, Debian 8–12, ARM64 Architecture, Security Hardening

Web & Ingress: Nginx Reverse Proxy, Apache, Let's Encrypt / Certbot, TLS 1.2/1.3, ECDH Elliptic Curve Tuning

Databases & Cache: MariaDB (10.3/10.6/10.11), MySQL, CouchDB, Redis, In-Memory DB Streaming (mysqldump network pipes)

Security & Governance: UFW, iptables, Fail2ban, SSH Key Vault Management, Role-Based Access CLI, FinOps Cloud Cost Reclamation

Currently Exploring: Kubernetes, Terraform, ELK Stack (Elasticsearch, Logstash, Kibana), GitLab CI/CD

PROFESSIONAL EXPERIENCE

DevOps Engineer

Remote

Lynx Solutions

Aug 2026 – Present

- Architect, monitor, and scale multi-cloud Linux infrastructure across 60+ active production nodes supporting multi-tenant enterprise client platforms.
- Built a centralized observability platform using Prometheus, Grafana (9-dashboard suite), Alertmanager, Loki, and Promtail; systematically resolved legacy alert conditions down to zero firing alerts fleet-wide.
- Containerized monolithic enterprise workloads into isolated Docker Compose microservice fleets on ARM64, executing live zero-downtime production cutovers with 100% database parity and zero data loss.
- Engineered direct in-memory database network streaming pipelines (mysqldump over secure SSH tunnels), migrating 30+ GB production databases without intermediate storage overhead.
- Developed automated role-based developer access and SSH key governance CLI platforms featuring automated ED25519 key generation, DNS routing, vault synchronization, and 3-layer zero-lockout connection validation.
- Conducted multi-cloud FinOps infrastructure audits across 70 cloud instances, optimizing recurring cloud expenditure by terminating idle resources and reclaiming dangling storage bloat.
- Resolved complex cryptographic production defects, including browser SSL/TLS handshake errors via modern cipher auto-negotiation and TLS 1.2/1.3 hardening.
- Executed high-stakes production recovery, resolving severe server lockups (reducing system load by 97.5%) and recovering 200+ GB of saturated storage on database nodes with zero downtime.

L-2 DevOps Engineer / Infrastructure Lead

Jaipur, Rajasthan

Avyukta Intellicall Consulting Pvt. Ltd.

Feb 2026 – Aug 2026

- Managed multi-cloud telephony infrastructure spanning AWS and OCI, maintaining 99.9% uptime for enterprise workloads sustaining 10,000+ daily calls.
- Automated server provisioning and configuration management across 20+ production Linux servers using Ansible playbooks, reducing deployment effort by 60%.
- Containerized application services using Docker, eliminating environment inconsistency issues by 80% between staging and production.
- Coordinated with cross-functional engineering teams, carriers, and telecom vendors to enforce strict SLA compliance.
- Integrated cloud-native monitoring and alerting dashboards, cutting mean time to resolution (MTTR) for infrastructure incidents by 45%.

PROFESSIONAL EXPERIENCE (CONTINUED)

Linux System and VoIP Engineer <i>Avyukta Intellicall Consulting Pvt. Ltd.</i>	<i>Jaipur, Rajasthan</i> <i>Jan 2024 – Jan 2026</i>
• Architected and maintained high-availability Asterisk PBX and VICIdial contact center clusters across AlmaLinux, CentOS, and Ubuntu. • Engineered SIP, PRI (E1), and GSM gateway integrations across multiple carrier networks, reducing network audio latency by 25%. • Hardened production Linux server environments with strict firewalling and access control, recording zero security breaches across 24 consecutive months. • Automated deployments via Bash and Ansible, cutting manual operational overhead by 60%. • Engineered disaster recovery workflows for Apache and MySQL, establishing a 1-hour Recovery Point Objective (RPO). • Configured automated offsite database backups, cron schedules, and log rotation for high-traffic telecom clusters. • Maintained 24/7 on-call rotation for critical infrastructure incidents, performing rapid triage and resolution.	

Intern – Client Support & System Administration <i>Avyukta Intellicall Consulting Pvt. Ltd.</i>	<i>Jaipur, Rajasthan</i> <i>Jan 2023 – Dec 2023</i>
• Administered day-to-day Linux servers across CentOS, openSUSE, Ubuntu, and RHEL, managing user accounts, permissions, and service patching. • Authored 15+ technical SOPs and runbooks, reducing resolution turnaround time for recurring support tickets by 30%. • Automated system health checks, disk monitoring alerts, and log rotation routines using custom Bash scripts.	

FEATURED PROJECTS

Enterprise Multi-Cloud Observability Suite & Zero-Alert Overhaul Prometheus, Grafana, Loki, Alertmanager, Node Exporter
Designed and deployed a centralized monitoring stack integrating Prometheus, Alertmanager, Grafana (9 custom dashboards), Loki, and Promtail across 60+ cloud servers. Calibrated PromQL swap-aware memory metrics, driving active alert count down to zero firing alerts fleet-wide.
Enterprise Monolith Docker Containerization & Zero-Downtime Migration Docker Compose, MariaDB, Nginx, ARM64
Containerized monolithic enterprise workloads into isolated Docker Compose microservice fleets on ARM64. Executed live zero-downtime production cutovers with 100% database parity, direct SSH database pipe streaming, and automated SSL/TLS ingress.
VICIdial Multi-Node Cluster Telephony Infrastructure Asterisk, VICIdial, AlmaLinux, CentOS, MySQL, Bash
Designed and deployed multi-node contact center clusters from scratch on AlmaLinux and CentOS with distributed Asterisk servers and shared MySQL backends, sustaining 10,000+ daily call volumes with sub-50ms latency (2023 – 2026).

CERTIFICATIONS

Red Hat Certified Engineer (RHCE)	<i>Red Hat · October 2025</i>
Red Hat Certified System Administrator (RHCSA)	<i>Red Hat · February 2025</i>
Architecting Solutions on AWS	<i>AWS · April 2026</i>
Oracle Cloud Infrastructure (OCI) Foundations	<i>Oracle · August 2025</i>

EDUCATION

Master of Computer Applications (MCA) – Cloud Computing Final Year <i>Manipal University Jaipur</i>	<i>2025 – 2027</i>
Specialization: Distributed Systems, Cloud Architecture, Infrastructure Automation	
Bachelor of Vocation (B.Voc) in IT / Computing Skills CGPA: 9.81 / 10 <i>Bharatiya Skill Development University</i>	<i>2022 – 2025</i>
Graduated with Distinction • Focus on Enterprise Linux Administration, Computer Networking & Systems	
Bachelor of Science <i>Singhania University</i>	<i>2019 – 2022</i>

ADDITIONAL INFORMATION

Languages: English (Professional Working Proficiency), Hindi (Native)
Work Authorization: Eligible to work immediately (Remote / Relocation Open)
