PROFESSIONAL SUMMARY

DevOps and Linux Systems Engineer with 3+ years managing enterprise infrastructure, VoIP systems, and cloud environments. Expertise in Linux administration, automation (Ansible, Docker), multi-cloud platforms (AWS, OCI), infrastructure security, and system monitoring. RHCE certified professional with proven ability to reduce deployment time, improve system reliability, and maintain 99.9% uptime for mission-critical systems.

TECHNICAL SKILLS

Operating Systems: Linux (CentOS, RHEL, AlmaLinux, Ubuntu, openSUSE), Windows Server, Unix-based systems
Cloud Platforms: Amazon Web Services (AWS), Oracle Cloud Infrastructure (OCI), Multi-cloud architecture
DevOps & Automation: Ansible, Docker, Shell Scripting (Bash), Configuration Management, Infrastructure as Code
Networking: TCP/IP, Firewall/Router/Switch Configuration, VPN, Load Balancing, Network Troubleshooting
VoIP & Telephony: Asterisk, VICIdial, SIP, RTP, PRI, GSM Gateway, Call Routing, Carrier Integration
Web & Database: Apache, Nginx, MySQL, MariaDB, Database Optimization, Query Performance Tuning
Security: System Hardening, Security Best Practices, Access Control, Vulnerability Assessment, Patch Management
Monitoring & Tools: Performance Monitoring, Log Analysis, Git, GitHub, tcpdump, Wireshark, Disaster Recovery

PROFESSIONAL EXPERIENCE

L-2 DevOps Engineer

Feb 2026 – Present

Avyukta Intellicall Consulting Pvt. Ltd. | Jaipur, Rajasthan, India

- Promoted to L-2 DevOps Engineer based on consistent performance in infrastructure automation and system reliability
- Provision, optimize, and maintain scalable cloud architectures ensuring high availability across enterprise workloads
- Implement DevOps best practices including Ansible automation and Docker containerization
- Drive continuous improvement by integrating cloud-native technologies and minimizing manual operational overhead

Linux System and VoIP Engineer

Jan 2023 – Jan 2026

Avyukta Intellicall Consulting Pvt. Ltd. | Jaipur, Rajasthan, India

- Architected and deployed highly available Asterisk and VICIdial telephony infrastructure for enterprise clients with 10,000+ daily call volumes and 99.9% uptime
- Automated infrastructure provisioning using Bash scripting and Ansible playbooks, reducing manual deployment time by 60% and minimizing production errors
- Engineered SIP, PRI, and GSM gateway integrations with multiple carriers, improving VoIP call quality and reducing network latency by 25%
- Administered comprehensive Linux server environments (CentOS, AlmaLinux, Ubuntu, RHEL), executing rigorous security hardening and patch management with zero security breaches
- Implemented real-time monitoring dashboards and alerting systems, reducing incident response time by 40% and decreasing overall system downtime by 35%
- Managed Apache and MySQL web and database stacks, establishing disaster recovery protocols to achieve RPO of 1 hour
- Troubleshoot complex network and VoIP issues using tcpdump, Wireshark, and Asterisk CLI tools
- Created comprehensive technical documentation and standard operating procedures for team training

EDUCATION

Master of Computer Applications (MCA) – Cloud Computing Specialization

2025 – Present

Manipal University Jaipur | Jaipur, Rajasthan, India

Bachelor of Vocation (B.Voc) in IT/Computing Skills – CGPA: 9.81

2022 – 2025

Bharatiya Skill Development University | Jaipur, Rajasthan, India

Bachelor of Science

2019 – 2022

Singhaniya University | Rajasthan, India

CERTIFICATIONS

- Red Hat Certified Engineer (RHCE) – Advanced Linux Administration & Automation
- Red Hat Certified System Administrator (RHCSA) – Core Linux System Administration
- Architecting Solutions on AWS – Amazon Web Services (April 2026)
- Oracle Cloud Infrastructure Foundations Associate – OCI Architecture & Services

NOTABLE PROJECTS

Linux From Scratch (LFS) – Custom Linux Distribution Build

- Built complete Linux operating system from source code, demonstrating deep understanding of system internals, kernel compilation, boot process, and manual package management
